

Servo Systems Division

Hidekazu Machida

The main product development in 1995 of the Servo Systems Division was targeted at strengthening the product range of AC servo systems and stepping motor systems by increasing the cost-performance and additional functions and reducing the size, from small capacity to large capacity systems.

The broadened product lineup provides a wide selection of servo systems to suit all types of applications.

■ AC Servo Motor

■ Sensor

■ AC Servo Amplifier

■ Stepping Motor

■ Stepping Motor Driver
